- [Azure Monitor Workbooks Overview](#) – great starting place when learning about workbooks

- [Configure a Log Analytics Workspace](#) – if you don't already have a LA workspace, use this tutorial to set one up

- [How to use Azure AD workbooks](#) - a brief write-up about most of the workbooks in the gallery

- [Microsoft Organization in GitHub](#) and [@azure-ad-workbooks](#) – join this GitHub Repo and team to learn much more about Azure AD Workbooks as well as to contribute.

- [Kusto Query Language (KQL) from Scratch](#) – great Pluralsight Tutorial for learning KQL

- [aka.ms/PreviewWorkbooks](#) – see Azure AD Workbooks in private preview!

  Note: You must be in one of the following Azure AD roles for you to access the workbook(s):
  1. Security Administrator
  2. Security Reader
  3. Report Reader
